

We believe in enhancing the competence and expertise of all emergency responders through simulation

## XVR On Scene

### ADVANTAGES

Participants walk, drive, fly, sail around in a simulated reality of an incident. Based on their observations they assess the risks and take appropriate measures

The instructor is always in control of the scenario and the learning experience. During the exercise, the instructor can respond to the student's decisions by activating events in the incident or jump to a next phase in the scenario

The scenario is completely adaptable to your local situation. A wide variety of environments can be filled with country specific 3D objects to make sure there's maximum realism

With XVR On Scene you can train repeatedly without having to set up expensive real life field training exercises. Training your staff with XVR On Scene means they can train their teamwork, encounter situations more often and learn from them and anticipate escalations

With the XVR Simulation platform you can teach, train, exercise, assess and evaluate. For Single and Multi-agency purposes, on the bronze, silver and gold level. With all modules the instructor is always in control.

Instructors have years of experience in training incident responders. XVR On Scene is designed as a supporting tool, giving instructors maximum flexibility to create scenarios according to a specific training objective. XVR On Scene can be used with a great variety of training set ups. From team training and exercising, to classical classroom teaching as well as individual training and assessment.

### WHY XVR ON SCENE?

We believe incident commanders benefit from experiencing incidents in a safe, controllable, repeatable and measurable environment. XVR On Scene is a powerful tool to help trainees understand concepts by experience, let's them acquire practical knowledge in a relatively short timeframe, practice decision making skills and experience situations that rarely occur in real life.

Scenario training in XVR On Scene provides trainees with the opportunity to practice complex incidents, apply protocols and interact in scalable scenarios.

## TRAINING WITH XVR ON SCENE?

### Classroom education

The classroom setup is used for triggering a group discussion about a virtual scenario. Discussions can focus on incident approach, carrying out the first reconnaissance or making the first deployment decisions.

### Individual training and assessment

With the individual setup the participant is immersed in a virtual scenario while the instructor can adjust the scenario based on the participants decisions. This setup is excellent for individual training or assessment of a certain skill set.

### Team training

The team setup allows you to train multiple participants in mono- or multidisciplinary exercises. One or more instructors can be in charge of the learning objectives and role-playing. Team training exercises are well suited to train communication and reporting skills.

In XVR On Scene, the instructor is always in control. The instructor sets the learning objectives, creates the scenario to make sure the trainee goes through all learning points.

## THE COMMUNITY

The XVR Simulation Platform is being utilized all over the world. The entire platform has been designed to stimulate the sharing of scenarios and custom objects. This way, users from all over the world benefit from each others knowledge and experience. Thanks to the enthusiastic and loyal community, the XVR Simulation Platform is filled with relevant custom content and new ways to train your staff every day.

Blue Orange Wave is preferred reseller in the maritime and offshore market for XVR Simulation
